Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

13. Claims 1-5 and 8-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to polynucleotides and primers which are deemed to specifically amplify gene fragments of mycobacterial species. It is unclear how one "specifically" amplify gene fragments of mycobacterial species when the claimed sequences: 1) share identity with other bacteria, i.e., Bifidobacterium, and 2) are sequences "comprising" the listed SEQ ID NOs. The use of the open language, comprising, allows unknown regions of any length on either end of the listed SEQ ID NOs. These unknown regions may also function as primers for unknown nucleic acid sequences. Therefore, because the SEQ ID NOs are not restricted to only mycobacteria and the claimed sequences may include any amount of unknown regions which may function as primers, it is unclear how the claimed specificity is achieved.

Conclusion

14. No claims are allowed.
